

Deploys/Stores Quickly
Low-LUX environment
Move parts in/out with forklifts, carts or cranes in minutes!

Chameleon's retractable blackout enclosures provide flexibility when inspecting.

In the industrial setting, these enclosures greatly simplify the non-destructive testing of large, hard-to-manuever work pieces. Work pieces can be maneuvered into position via overhead crane or forklift.

In space-sensitive settings our retractable is also the answer to the 'Occasional Use' question as this retractable folds away to a fraction of its size, leaving valuable floor space available for other work.

PRODUCT HIGHLIGHTS

- Retracts to provides 360° complete access to work area
- Retracts to 20%
- Engineered for your specific applications to meet your challenges
- Easily mount UV lights to rolling structures
- Structural materials and fabric types adapted to your application
- Turn-key solutions available (Installation and commissioning)

OTHER APPLICATIONS

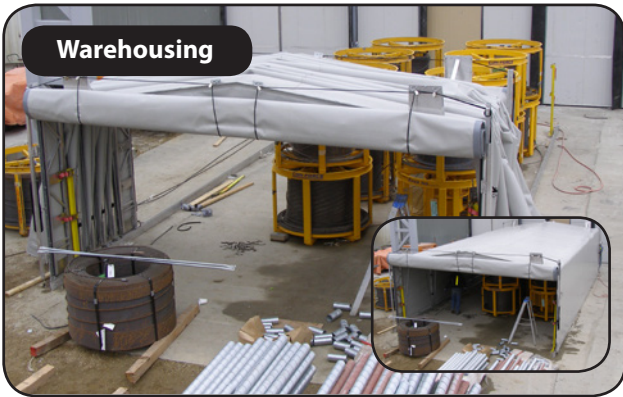

Mobile Workstations

Fume & Dust Collection

Warehousing

Spray Painting & Filtration

Outdoor Retractable Buildings

Transportation
