

The Chameleon retractable enclosure presents the latest innovation for the manufacturing and industrial finishing industries.

In the industrial setting, Chameleon's retractable spray enclosure greatly simplifies the painting of large, hard-to-maneuvre work pieces.

Prep work & spray painting of both small and heavy/immovable fabrication is no longer a health hazard and safety nightmare as Chameleon Retractable Enclosures retract out of the way so that work pieces can be manoeuvred into position via overhead crane or forklift.

PRODUCT HIGHLIGHTS

- Adapt your facility to quickly meet government environment & health/safety demands.
- Start doing the spray paint jobs that you did not have the space to do.
- Save time & space.
- Retracts to give 360° work piece delivery access to work area.
- Folds away to transform paint area into a work area.

Highly translucent fabric lets light shine in.
